Analyze data and conduct a content inventory with USAGov

Project Title	Analyze data and conduct a content inventory with USAGov
	Work with GSA's USAGov in analyzing data and conducting a content inventory to help shape a future content strategy for our website.
Country	United States

Project Description

USAGov is an omnichannel platform that aggregates information across federal government programs and services, giving us a unique vantage point on some of the public's top government needs. During an internship with us, you will help to analyze quantitative and/or qualitative data. You will also collaborate with another team member in doing an inventory to help assess current content and shape a future content strategy for our website.
